CONFIDENTIAL - INTERNAL TRAINING AND HANDOVER

MBKRU ADVOCATES - PROGRAMME OPERATIONS

Training Team Handbook

Complete platform guide with accuracy audit, security talking points, MBKRU Voice chatbot (English demos), and Report Card verified/unverified filters.

Platform: https://mbkru.org/
Version: 2.2.2 - July 2026
Registration: No Ghana Card at registration
Report Card: Verified / Unverified public Voice filter live
Accuracy: Section 20 - checked against UI, backend, and admin

Platform: https://mbkru.org/

Document type: Staff training & programme handover guide (complete feature set)

Audience: Training facilitators, programme operators, community stewards, diaspora ambassadors, new staff

Version: 2.2.2 - July 2026

Language of training & chatbot assistance: English only (no translation)

Related: `MBKRU_PLATFORM_HANDOVER_REPORT.md`, `/methodology`, `docs/SECURITY_CHECKLIST.md`, `docs/COMMUNITIES_PUBLIC_GOVERNANCE.md`, `docs/CSV_IMPORT_RUNBOOK.md`, `docs/VOICE_AND_ACCESSIBILITY_GUIDE.md`, `docs/MBKRU_Diaspora_Programme_Integration.pdf`

Document control & leftovers cleanup (v2.2)

Change	Detail
Registration	**Ghana Card removed** from registration training - do not teach it as a join step
Ghana Card (account)	Optional verify may still appear on `/account`; can gate **MP performance** submit when Hubtel is configured - train as optional/advanced, not registration
MBKRU Voice chatbot	Site-wide assistant; **training demos in English only**; product may still show a language control - do not promise multilingual translation
Chatbot availability	Works with OpenAI when configured; **FAQ fallback** still answers without API keys
Report Card verification	**Public filter live:** Verified / Unverified / All on `/report-card` Voice browse (and regional hubs). Staff set tiers in admin
Platform accuracy	**Section 20 audit** - handbook claims checked against frontend, backend, and admin
Platform security	**Section 16** - trainer talking points
Scope	Full Phase 1-3 feature handover

How to use this handbook

If you are...	Start with...
New trainer	Sections 1-2, then modules in order
Checking "is this really live?"	**Section 20 Platform accuracy audit**
Running a lab	Appendix A (URLs) + Appendix B (drills)
Onboarding Queen Mothers	Section 8 Communities
Onboarding diaspora ambassadors	Section 12 Diaspora
Editorial / accountability staff	Sections 9-11 (incl. verified report filters)
Support / front-line staff	Section 5 MBKRU Voice chatbot + Section 4 Voice reports

Table of contents

1. Platform overview
2. Who uses the platform (roles)
3. Member registration & sign-in
4. MBKRU Voice - citizen reports
5. **MBKRU Voice chatbot (English assistant)**
6. Petitions & other public forms
7. Situational alerts & election observation
8. Communities & Queen Mother council portal
9. Parliament tracker - MPs roster
10. Promises & government tracker
11. People's Report Card - scorecard methodology
12. Diaspora programme
13. Public content, guidance & regional hubs
14. Member account, notifications & privacy
15. Staff admin console - full operations map
16. **Platform security (trainer talking points)**
17. Trust, safety & boundaries
18. Suggested training curriculum
19. Complete feature checklist (leave nothing out)
20. **Platform accuracy audit (UI / backend / admin)**
21. Appendices

1. Platform overview

1.1 What MBKRU Advocates is

MBKRU Advocates is Ghana's civic accountability and citizen engagement platform. It helps citizens, traditional leaders, diaspora supporters, researchers, and programme staff to:

- Monitor **MPs** and **government commitments** with cited evidence
- Submit and track **citizen reports** (MBKRU Voice)
- Get **English-language assistance** from the **MBKRU Voice chatbot** on how to use the platform
- Run and sign **petitions**
- Participate in **community spaces** (including Queen Mother councils)
- Publish a transparent **People's Report Card**
- Support **diaspora** engagement with official signposting and feedback

MBKRU is **evidence-led** and **non-partisan**. It is **not** the Electoral Commission, Parliament, a court, CHRAJ, the police, NIA, or a law firm.

1.2 Programme phases (all live)

Phase	What users see	Status
Phase 1	Public website, news, resources, partners, contact, diaspora hub	Live
Phase 2	Members, Voice reporting, chatbot, petitions, parliament/promises, communities	Live
Phase 3	People's Report Card, election observation, partner data access	Live

Production: **https://mbkru.org/** runs the full Phase 1-3 programme.

1.3 Platform map (teach first)

```
PUBLIC                        MEMBER                          STAFF ADMIN

------------------------      ------------------------------  ------------------------------

Home / About / News           Register and login              Content CMS

Resources / Partners / Contact Submit and track reports       Reports triage

Methodology / Data sources    MBKRU Voice chatbot (English)   Voice analytics

Parliamentarians tracker      Petitions                       Petitions

Promises / Government tracker Communities and forums          Parliament and promises

People's Report Card          Council portal (leaders)        Report Card editor

Diaspora hub and feedback     My account and notifications    Communities and verifications

Town halls / Debates / Regions Privacy export / delete        Diaspora feedback inbox

Whistleblowing / Legal        Accessibility assistive tools   Operators, audit, settings

Transparency (Voice stats)                                    Notification outbox
```

1.4 One-sentence pitch for trainers

> MBKRU gives Ghanaians a trusted place to ask for help in English, report what they experience, follow commitments with evidence, organise in communities, and see MP accountability scores - without replacing official institutions.

---

2. Who uses the platform (roles)

Actor	Login?	What they can do
Public visitor	No	Browse all public pages; use **MBKRU Voice chatbot**; track reports with a code; sign some petitions

Member (citizen)	`/login`	Reports, petitions, communities, account
Community member	Yes + membership	Forums (subject to moderation)
Community moderator	Yes + role	Approve joins, moderate posts, manage members
Queen Mother (verified)	Yes + verified role	Moderator tools + **sign Council MP Evaluations**
Admin / operator	`/admin/login`	Full staff console (**separate** from member login)
MP	No login	Appears as data only
Diaspora supporter	No special role	Public pages + optional member account

Critical: `/login` is not the same as `/admin/login`.

---

3. Member registration & sign-in

3.1 Registration policy (current)

Item	Rule
Ghana Card at registration	**Not used. Do not teach it.**
Required	Email, password (at least 8 characters), confirm password, **region**
Optional	Display name, constituency
After success	Redirect to `/account` (or intended next page)

3.2 Register - steps

1. Open https://mbkru.org/register
2. Enter email
3. Create and confirm password
4. Optional display name
5. Select **region** (required)
6. Optional constituency
7. Submit -> land on **My Account**

3.3 Sign-in & recovery

Action	URL
Sign in	`/login`
Forgot password	`/forgot-password`
My account	`/account`
My reports	`/account/reports`

Notifications	`/account/notifications`

3.4 Identity messaging for trainers

- Joining MBKRU **does not** require Ghana Card.
- Official **NIA Ghana Card** guidance for diaspora lives on `/diaspora` as **government signposting**, not as MBKRU registration.
- **Optional:** `/account` may still offer Ghana Card verify for programme trust features. When Hubtel is configured, **MP performance** report submit can require a verified card - other report types do not.
- Do not revive old training slides that list Ghana Card as a **registration** field.

---

4. MBKRU Voice - citizen reports

4.1 What Voice reporting is

Citizen reporting channel with evidence and tracking. Staff triage. Approved items may become public **causes**.

Page	URL
Hub	`/citizens-voice`
Submit	`/citizens-voice/submit`
Election submit	`/citizens-voice/submit/election`
Track	`/track-report`
Public causes	`/citizens-voice/causes`
Discussion (per report)	`/citizens-voice/discussions/[reportId]` - **no standalone discussions index**
Transparency stats	`/transparency`

4.2 Report types (teach all five)

Type	Example	Notes
MBKRU Voice (general)	Street lighting, procurement, service delivery	Member account
MP performance	Surgery hours, responsiveness, casework	May require Ghana Card on account when Hubtel is on
Government performance	Assembly timelines, executive delivery	Member account
Situational alert	Market closures, road blocks	Member account
Election observation	Queue times, accessibility	Phase 3 feature flag

4.3 Submit a report - steps

1. Sign in

2. Go to `/citizens-voice/submit`
3. Choose report type
4. Complete title, description, location, related MP/institution if relevant, attachments
5. Submit and **save the tracking code**
6. Confirm under **My Account -> Reports**

4.4 Track a report

1. Open `/track-report`
2. Enter tracking code
3. Read status

Status	Meaning
RECEIVED	Logged
UNDER_REVIEW	Staff assessing
ESCALATED	Further action
CLOSED	Complete
ARCHIVED	Retained, not active

4.5 Staff triage

Admin: `/admin/reports`

1. Open queue -> read submission + attachments
2. Assess credibility / safety / duplicates
3. Update status + staff notes
4. Promote suitable items to **public causes**
5. Monitor `/admin/analytics/citizen-reports` and MP performance signals

Council evaluations (Queen Mother sign-off) arrive as intake source **Council evaluation**.

4.6 Public causes & discussions

- Staff promote approved reports to `/citizens-voice/causes`
- Public can discuss on discussion pages with comments and reactions (Like / Thank / Insight)
- Do not publish personal data from private reports without policy consent

---

5. MBKRU Voice chatbot (English assistant)

> **Training standard:** Demos and answers for this handover are **English only**. The assistant answers **relevant questions** about using MBKRU. It is **not a translation service**. If the product UI still shows a language control, trainers should leave it on **English (Ghana)** and not teach multilingual translation as a programme promise.

5.1 What it is

MBKRU Voice is the always-available floating chat assistant on the public site (site-wide launcher). It helps visitors and members find the right page, understand how to report, track commitments, join communities, use diaspora signposting, and navigate the platform safely.

It is **guidance**, not legal advice, emergency response, or an official government desk.

5.2 Where to find it

Entry point	How
Floating **MBKRU Voice** button	Bottom of most public pages
Citizens Voice page CTA	"Open MBKRU Voice chat"
Mobile / header Voice control	Opens the same chat panel
Accessibility tools	Can hand a spoken transcript into the chat

5.3 What it can help with (relevant questions)

Train staff to steer users toward these topics:

Topic	Example user question	Typical help
Reporting	"How do I submit a report?"	Links to Citizens Voice / submit / track
Petitions	"How do I start a petition?"	Browse / create petition links
Accountability	"Where do I see MP promises?"	Promises, government tracker, parliament, Report Card
Communities	"How do I join a Queen Mother community?"	Communities / town halls
Diaspora	"I live abroad - where do I start?"	Diaspora hub + official .gov.gh signposting
Contact / policy	"How do I contact MBKRU?"	Contact, FAQ, data sources, privacy

5.4 What it must not do (teach this)

Do not	Instead
Translate pages or chat into other languages (training scope)	Answer in **English**
Give legal strategy or litigation advice	Point to `/legal-empowerment` and qualified professionals
Give emergency / crisis / violence instructions	Direct to local emergency services + `/whistleblowing` / `/contact`
Issue Ghana Cards, passports, or book missions	Signpost to NIA / MFA / GIS via `/diaspora`
Invent election results or court findings	Point to methodology and official sources
Replace staff triage of reports	Guide the user to submit / track correctly

5.5 How the assistant works (for trainers)

1. User opens chat and types a question in **English**
2. Safety guardrails check for emergency / self-harm / legal-strategy prompts
3. When OpenAI is configured, the assistant uses site knowledge (and optional web search if enabled) to answer
4. When OpenAI is not configured, **built-in FAQ / intent fallbacks** still reply with useful English guidance and links
5. Replies may include **suggested links** to the right MBKRU pages
6. Optional: attach image / `.txt` / PDF for context; optional read-aloud of replies (assistive)

5.6 Features to demonstrate in training

Feature	Trainer note
Text Q&A	Keep demo questions in English
Suggested links	Click through to prove navigation help
Quick prompts	Use for first-time users
Clear chat	Reset between trainee demos
Attachments (image / text / PDF)	Optional - for interpreting evidence context, not for filing a formal report
"Search the web" (if enabled)	Optional live context; still not official government advice
Fallback mode	Unplug / unset API key in staging to show FAQ still works
Rate limiting	Rapid spam may return "too many requests"

5.7 Staff analytics

Admin page	Purpose
`/admin/analytics/mbkru-voice`	Chatbot usage summary
`/admin/analytics/mbkru-voice/events`	Raw telemetry event log
Export	CSV/JSON export from analytics tools

5.8 Chatbot practice script (lab)

1. Open mbkru.org -> open **MBKRU Voice**
2. Ask: "How do I submit a citizen report?" -> follow suggested link
3. Ask: "Where can I track government commitments?"
4. Ask: "I am in the diaspora - how do I get Ghana Card help?" -> confirm it **signposts**, does not process ID
5. Ask a legal-strategy style question -> confirm safe refusal + Legal empowerment link
6. Clear chat and repeat with a second trainee

---

6. Petitions & other public forms

6.1 Petitions

Action	Who	URL
Browse	Anyone	`/petitions`
Create	Members	`/petitions/new`
Sign	Anyone (guest may confirm email)	`/petitions/[slug]`
Moderate	Staff	`/admin/petitions`

Create: sign in -> `/petitions/new` -> title, problem, ask -> submit -> share link.

Sign: open petition -> complete form -> confirm email if prompted.

Admin: moderate visibility/status; review pending signature analytics.

6.2 Other forms

Form	URL	Admin inbox
Contact	`/contact`	Contact submissions
Newsletter / early access / tracker signup	Site CTAs	Lead capture
Diaspora feedback	`/diaspora/feedback`	Diaspora feedback
Community verification upload	Community membership panel	Community verifications
Report attachments	Voice submit	Attached to report

Always show the **citizen -> admin inbox -> response** loop.

---

7. Situational alerts & election observation

7.1 Situational alerts

- Hub: `/situational-alerts`
- Submit: `/situational-alerts/submit` (members)
- Time-sensitive local situations; triaged with Voice reports

7.2 Election observation

- Hub: `/election-observation`
- Structured submit: `/citizens-voice/submit/election`
- Observe process and accessibility - **do not** declare winners or act as EC

---

8. Communities & Queen Mother council portal

8.1 What a community is

Bounded space (often traditional area / geography) for announcements, forums, concerns, and council workspace. **Not** a replacement for courts, police, CHRAJ, or customary dispute processes outside the platform.

8.2 Admin - register a community

Path: `/admin/communities`

1. Admin login
2. Create community with: slug, name, description, region, traditional area, visibility (`PUBLIC` / `MEMBERS_ONLY`), join policy (`OPEN` / `APPROVAL_REQUIRED`)
3. Starts as **DRAFT**
4. **Activate** -> **ACTIVE** when ready
5. Only **ACTIVE + PUBLIC** appear in the public directory

Also: provision stewards, set default MP if used, review verifications (`/admin/community-verifications`), moderate posts (`/admin/communities/moderation`), handle post reports (`/admin/community-reports`).

8.3 Users join - steps & benefits

1. Browse `/communities`
2. Open `/communities/[slug]`
3. Sign in / register
4. Join now (**OPEN**) or request (**APPROVAL_REQUIRED**)
5. Use forums; leaders use portal / manage

Benefits: local moderated discussion; announcements & concerns; reply notifications; path to traditional-role verification; council MP evaluations feeding programme accountability.

8.4 Queen Mother / council portal

URL: `/communities/[slug]/portal`

Area	Purpose
Concerns	Council issue capture
Announcements	Leadership communications
Council discussion	Internal conversation
Presence	Who is active
Membership	Join / verification
Council MP Evaluation	Structured MP meeting evaluation

Evaluation path: draft -> Queen Mother **sign-off** -> Citizen Report (Council evaluation) -> `/admin/reports` .

Manage: `/communities/[slug]/manage` - approve joins, roles, bans, moderate posts.

8.5 Forum vocabulary

Forum -> Thread -> Reply / Pending (awaiting moderation) / Locked forum

---

9. Parliament tracker - MPs roster

9.1 Public

- `/parliament-tracker` - search sitting MPs
- `/regions/[slug]` - regional hubs

9.2 Staff load MPs

Admin: `/admin/parliament`

1. Ensure regions exist
2. Import constituencies CSV first
3. **Dry-run reconcile** MP CSV
4. Review creates / updates / errors
5. Import MP CSV
6. Spot-check public tracker

MP CSV headers: `name,slug,role,party,constituency_slug,active`

Detail: `docs/CSV_IMPORT_RUNBOOK.md`, `docs/DATA_SOURCES.md`.

---

10. Promises & government tracker

10.1 Public views

Page	Shows
`/promises` / browse	Tracked pledges
`/promises/[slug]`	One promise / MP pledge sheet
`/government-commitments`	Government programme filter

Statuses: TRACKING / IN_PROGRESS / FULFILLED / BROKEN / DEFERRED / BLOCKED

10.2 Staff upload / edit promises

1. `/admin/parliament` -> select MP
2. Create promise with title, source/citation, government-programme flag, status
3. Update status + evidence over time
4. Confirm on public catalogue

Rule: Citizen reports illustrate problems; they do **not alone** mark a promise fulfilled.

10.3 Manifestos & exports

- Admin -> Manifestos for source registry
- Exports: MPs CSV, promises CSV
- Partner API summary: `/partner-api`

---

11. People's Report Card - scorecard methodology

11.1 Public pages

- `/report-card` / `/report-card/[year]` / `/methodology` / `/data-sources`

Two browse tabs on `/report-card` (when both are enabled):

Tab	What users see	Filters
Voice submissions	Citizen reports feeding accountability	Region, report type, **Verification (All / Verified / Unverified)**, title search
Programme scores	Published MP scorecard rows	Year, region, search

11.1a Verified vs unverified reports (live)

Staff set an **experience verification tier** on each report in `/admin/reports/[id]`:

Staff tier	Public label
UNVERIFIED (default)	**Unverified**
CORROBORATED	**Verified**
DOCUMENTED	**Verified**

Council MP evaluations signed by a Queen Mother typically enter the queue already **CORROBORATED** (shown as Verified).

Public filter (train this): On the Report Card Voice tab (and regional hubs), users choose:

1. **All reports**
2. **Verified only** - staff-corroborated or documented
3. **Unverified only** - not yet corroborated

Cards show a **Verified** or **Unverified** badge. Index C of the scorecard methodology remains an **editorial** use of citizen experience - publishing MP scores is still a staff Report Card workflow, separate from the public Voice browse filter.

11.2 Triple index (Ghana v1)

Index	Focus	Weight
A - Legislative duty	Official parliamentary record	~50%
B - Constituency representation	Reachability, casework pathways, documented transparency	~35%

C - Citizen-verified experience	Triaged Voice / council signal (capped)	~15%

Evidence ladder: Tier A official -> Tier B secondary -> Tier C moderated citizen experience.

11.3 Government tracker vs Report Card

Product	Focus
Report Card	MP as legislator / representative
Government tracker	Programme / manifesto commitments with evidence

11.4 Publish process (staff)

1. `/admin/report-card` - create cycle
2. Edit MP narratives + scores
3. Editorial + methodology review
4. Optional dispute window for official-data facts
5. Publish only after sign-off
6. Verify public page

"**Pending**" is not final findings.

---

12. Diaspora programme

12.1 Overview

Hub `/diaspora` helps Ghanaians abroad and returnees with:

1. Signposting to official channels (NIA, passport, nationality)
2. Accountability collaboration (commitments, petitions, feedback)
3. Structured diaspora feedback (`/diaspora/feedback`)

Admin review: `/admin/diaspora-feedback`

Context: "17th Region" news briefing

MBKRU does not replace embassies, NIA, GIS, MFA, or lawyers.

12.2 How diaspora access the platform

No special diaspora login. Use public site; register as member for Voice/petitions/communities.

Need	Path
ID / passport / nationality guidance	`/diaspora` -> official links
Track government commitments	`/government-commitments`
Petitions	`/petitions`
Feedback	`/diaspora/feedback`

Civic reports	Register -> Voice submit
Ask "how do I...?"	**MBKRU Voice chatbot (English)**
Partners	`/partners` , `/contact`

12.3 Benefits

- Official signposting (avoid unofficial "agents")
- Same transparency tools as residents
- Amplify petitions; structured feedback into the programme
- Optional full member participation
- Non-partisan engagement with Ghana's accountability agenda

---

13. Public content, guidance & regional hubs

Trainers should walk these even if not "transactional":

Area	URL	Purpose
Homepage	`/`	Programme overview, stats, shortcuts
About	`/about`	Organisation & pillars
News	`/news`	Editorial updates
Resources	`/resources`	Downloadable documents
Partners	`/partners`	Partners & collaboration
Contact	`/contact`	Enquiries
FAQ	`/faq`	Common questions
Privacy / Terms / Accessibility	`/privacy` , `/terms` , `/accessibility`	Trust pages
Methodology	`/methodology`	How scoring & tracking work
Data sources	`/data-sources`	Where data comes from
Legal empowerment	`/legal-empowerment`	Signposting (not legal advice)
Whistleblowing	`/whistleblowing`	Safe escalation guidance
Town halls	`/town-halls`	Programme events / forums
Debates	`/debates`	Constituency debate surface
Regions	`/regions/[slug]`	16 regional hubs
Partner API	`/partner-api`	Research/media data terms
Transparency	`/transparency`	Aggregate Voice statistics

13.1 Accessibility assistive tools (related to Voice)

Floating accessibility controls can: read page summary, read selection, speech-to-text, hand transcript to chatbot, adjust speech rate.

Training note: Demonstrations and chatbot answers for this handover remain **English**. Do not present translation of the site or chatbot replies as a trained programme capability.

---

14. Member account, notifications & privacy

Feature	URL / location	Notes
Account home	`/account`	Reports, explore links, status
My reports	`/account/reports`	Personal submissions
Notifications	`/account/notifications`	In-app alerts (replies, status, community)
Password recovery	`/forgot-password`	Needs email configured to deliver
Privacy export / delete	Account privacy tools	Support staff must know the path
Email / SMS outbox	Admin notifications	Status updates when Resend/Twilio configured

---

15. Staff admin console - full operations map

Login: `/admin/login` / Operators: `/admin/operators` / Audit: `/admin/operational-audit`

Group	Areas
Overview	Dashboard
Content	News posts, media library, resources, manifestos, partners & leadership
Voice & inbound	Citizen reports, report analytics, MP performance signals, MBKRU Voice analytics & event log, petitions, petition pending analytics, public causes, contact, leads, diaspora feedback
Accountability	Parliament & promises, Report Card, town halls
Communities	Communities, post moderation, community reports, verifications, members
System	Operators, regions, notification outbox, operational audit, site settings (maintenance)

Daily operator checklist

- Triage new citizen reports
- Petitions moderation
- Community posts & verifications
- Contact + diaspora feedback inboxes
- Notification outbox stuck jobs
- Spot-check public pages after publishes
- (Weekly) Review MBKRU Voice analytics for friction themes

---

16. Platform security (trainer talking points)

> **Trainer message:** MBKRU was built with **enterprise-grade security controls** across login, forms, admin, uploads, and public APIs. You can tell cohorts - with confidence - that the platform is **secure by design**: separate staff and citizen sessions, hardened cookies, rate limits, bot protection, validated inputs, private evidence storage, audit trails, and modern browser security headers on every page.

16.1 One-minute pitch (memorise this)

> "MBKRU protects citizens and staff with layered security. Member and admin logins are completely separate. Passwords are hashed, sessions use secure httpOnly cookies, public forms are rate-limited and can use bot protection, every API input is validated, report attachments are stored privately with size and type limits, and the site ships with strong security headers (including HTTPS enforcement and clickjacking protection). Sensitive admin actions can be audited. The chatbot and Voice tools also refuse unsafe emergency or legal-strategy prompts."

16.2 Security controls trainers should explain

Layer	What is in place	Plain-language line for trainees
Separate login worlds	Member `/login` and staff `/admin/login` use **different session secrets**	Staff access cannot be confused with a citizen account
Strong passwords	Passwords stored with **bcrypt hashing** (never plain text)	Even database staff cannot "read" your password
Secure sessions	Cookies are **httpOnly**, **Secure** in production, **SameSite=lax**	Scripts in the browser cannot steal your session cookie easily
Admin lock-down	Admin routes require a **valid admin session**; login is **rate-limited**	Brute-force guessing of staff passwords is throttled
Bot & abuse protection	**Rate limits** on contact, auth, reports, chatbot, partner reads; optional **Cloudflare Turnstile**	Spammers and scrapers are slowed or blocked
Input validation	**Zod** schemas on JSON bodies; **Prisma** parameterized queries (no raw user SQL)	Classic injection-style attacks are designed out
Upload safety	Report / media uploads respect **size and MIME limits**; private storage paths are sanitised	Evidence files cannot be arbitrary malware dumps
Privacy of presence	Peer display names on hubs/presence only when the viewer is **signed in**	Guests do not get a free list of who is online by name
Privacy tools	Members can **export** or **delete** account data (with safeguards)	Users keep control of their personal data
Chatbot safety	Guardrails block emergency / self-harm / legal-strategy prompts	The assistant will not give dangerous advice
Browser hardening	Global headers: **CSP**, **HSTS**, **X-Frame-Options**, and related protections	Pages resist clickjacking and force HTTPS in production
Operational audit	Sensitive admin actions can be reviewed in **Operational audit**	Programme can see who did what in the staff console

Notification outbox	Email/SMS jobs are queued and retryable - not ad-hoc scripts	Delivery is controlled and observable

16.3 What "secure" means for each audience

Audience	Reassure them that...
Citizens / members	Their login is protected; reports and attachments are handled under programme controls; tracking codes do not expose other people's data
Queen Mothers / stewards	Community manage tools require verified membership roles; moderation and bans are intentional leadership actions, not open to every joiner
Diaspora users	Feedback and forms are rate-limited; MBKRU signposts official .gov.gh sites and does not harvest passport/ID processing
Staff / admins	Admin is a closed surface; operators are managed deliberately; heavy exports are rate-limited per session
Partners / media	Public partner reads are rate-limited; research exports follow programme access rules

16.4 Demo script for the security module (10-15 min)

1. Show member login vs admin login URLs - emphasise **two different doors**.
2. In browser DevTools (trainer only), show a session cookie flagged **HttpOnly** (and Secure on production).
3. Submit the contact or chatbot form rapidly in staging to show **rate limiting** if configured.
4. Open `/admin/operational-audit` (staff) and explain that sensitive actions leave a trail.
5. Ask the chatbot a legal-strategy or crisis-style question and show the **safe refusal**.
6. Point to `/privacy` and account privacy tools - security includes **user rights**, not only locks.
7. Close with: "Security is layered - no single control does everything; MBKRU stacks many controls together."

16.5 Trainer do's and don'ts

Do	Don't
Say the platform is **built with strong, layered security** suitable for civic data	Claim MBKRU is "unhackable" or that no further review will ever be needed
Name concrete controls (separate sessions, hashing, rate limits, headers, audit)	Share production secrets, admin passwords, or API keys in class
Point trainees to `/privacy` and safe reporting habits	Ask trainees to paste real national ID numbers into chat or demos
Encourage strong unique passwords and logging out on shared devices	Use the same password for admin and personal email in demos

16.6 Related ops documents (for advanced trainers)

- `docs/SECURITY_CHECKLIST.md` - living release / quarterly security checklist
- `docs/OPS_RUNBOOK.md` - production operations
- `docs/ARCHITECTURE.md` - how systems fit together

17. Trust, safety & boundaries

MBKRU does	MBKRU does not
Host moderated citizen reports	Replace police / CHRAJ / courts
Answer relevant questions in English via chatbot	Act as translator or emergency desk
Track commitments with citations	Declare election winners
Publish methodology-based scores	Issue legal rulings or national IDs
Signpost diaspora to official sites	Provide immigration legal advice
Support traditional council digital workspace	Replace customary dispute forums entirely
Protect accounts, forms, and admin with layered security	Replace users' own password hygiene or device safety

Demo/seed content must never be presented as real citizen findings in public communications.

18. Suggested training curriculum

Week	Focus	Outcomes
1	Overview, roles, registration (no Ghana Card), **security pitch**, **MBKRU Voice chatbot English lab**	Register; explain security layers; use chatbot; admin accounts
2	Voice reports, causes, petitions, contact, diaspora feedback	One of each form + triage
3	Communities, portal, Queen Mother evaluation	Pilot community end-to-end
4	MPs CSV, promises, government tracker, Report Card draft	Sample promise + draft scorecard (no premature publish)

Half-day agenda

1. Platform story & roles - 25 min
2. Registration lab - 15 min
3. **Platform security talking points + mini-demo** - 15 min
4. **MBKRU Voice chatbot lab (English)** - 30 min
5. Voice reports + tracking - 40 min
6. Petitions & forms - 25 min
7. Communities & Queen Mother portal - 50 min
8. Parliament / promises / government tracker - 40 min
9. Scorecard methodology - 40 min
10. Diaspora programme - 25 min
11. Admin ops, analytics, trust boundaries - 25 min
12. Assessment drill - 20 min

19. Complete feature checklist (leave nothing out)

Use this as the master "have we trained it?" list:

- Homepage, About, News, Resources, Partners, Contact, FAQ
- Privacy, Terms, Accessibility
- Member register / login / forgot password / account / reports / notifications / privacy tools
- **MBKRU Voice chatbot (English Q&A, links, fallback, guardrails, analytics)**
- Accessibility assistive panel (read / dictate - English demos)
- Citizens Voice hub, submit (all kinds), track, causes, discussions, transparency
- Situational alerts hub + submit
- Election observation hub + election submit
- Petitions browse / create / sign / admin
- Contact, leads, diaspora feedback forms
- Communities browse / join / forums / portal / manage
- Admin create community DRAFT->ACTIVE, verifications, moderation, community reports
- Council MP Evaluation -> reports queue
- Parliament tracker + CSV import dry-run
- Promises catalogue + government commitments + manifesto registry
- People's Report Card + methodology + data sources + admin publish flow
- **Report Card Voice filter: All / Verified / Unverified** + badges on cards
- Staff set experience verification tier on `/admin/reports/[id]`
- Diaspora hub + journeys + feedback + admin review
- Town halls, debates, regional hubs
- Legal empowerment, whistleblowing
- Partner API page + CSV/JSON exports awareness
- Admin full nav groups + operators + audit + settings + notification outbox
- **Platform security pitch** (separate sessions, hashing, rate limits, headers, audit, chatbot guardrails)
- Optional Ghana Card on `/account` / MP performance gate (when Hubtel on)
- What MBKRU is **not** + demo-data hygiene

---

20. Platform accuracy audit (UI / backend / admin)

Reviewed against the live codebase (July 2026). Use this when someone asks: "Is everything in the handbook actually built?"

20.1 Confirmed live (frontend + backend + admin where claimed)

Area	Status
Registration without Ghana Card; login; forgot password; account; reports; notifications; privacy export/delete	Live
Voice reports (5 kinds), track, causes, discussion threads, transparency	Live

MBKRU Voice chatbot (site-wide), FAQ fallback, attachments, optional web search, admin analytics	Live
Accessibility assistive tools	Live
Petitions browse / create / sign / admin	Live
Situational alerts; election observation (Phase 3 flag)	Live
Communities browse/join/portal/manage; admin DRAFT->ACTIVE; verifications; moderation	Live
Council MP Evaluation -> reports queue	Live
Parliament tracker; CSV import; promises; government commitments; manifestos	Live
Report Card public + admin cycles; methodology; data sources	Live
Verified / Unverified public filter on Report Card Voice browse	Live
Diaspora hub + feedback + admin	Live
Town halls, debates, regions, legal, whistleblowing, partner API page	Live
Full admin nav (content, Voice, accountability, communities, system)	Live
Security controls in Section 16 (sessions, bcrypt, rate limits, headers, audit, etc.)	Live (some optional: Turnstile, Redis, Hubtel)

20.2 Caveats trainers must state accurately

Topic	Accurate line
Ghana Card	**Not** on registration. May still appear on **My Account**; can gate **MP performance** when Hubtel is configured
Chatbot language	**Train in English.** Product may show a language control - do not promise translation
Discussions	Per-report URLs only - no `/citizens-voice/discussions` index page
Partner API	Public terms page + rate-limited CSV/JSON - not a private partner console
Phase flags	Confirm production runs Phase 3 so election observatory and full scorecard depth are visible
Town halls / debates	Live directories; often programme/planning surfaces rather than full interactive debate tools
Security pitch	Strong layered controls - do not claim "unhackable"

20.3 How verified reports flow (end-to-end)

1. Citizen or council submits a report
2. Staff triage at `/admin/reports`
3. Staff set experience verification tier: UNVERIFIED, CORROBORATED, or DOCUMENTED
4. Public `/report-card` Voice tab can filter: All, Verified, or Unverified (badge on each card)
5. Separately, editors may use verified experience in Index C when publishing scores in `/admin/report-card`

20.4 Staff how-to - mark a report verified

1. Open `/admin/reports` -> select report
2. Set **Experience verification** to Corroborated or Documented
3. Save
4. On https://mbkru.org/report-card (Voice tab), choose **Verified only** - the report should appear with a **Verified** badge

---

Appendices

Appendix A - Quick URL reference

Audience	URL
Public home	https://mbkru.org/
Register	https://mbkru.org/register
Member login	https://mbkru.org/login

Transparency	https://mbkru.org/transparency
Staff admin	https://mbkru.org/admin/login

Appendix B - Competency drills

Trainee is competent when they can:

1. Register **without** mentioning Ghana Card
2. Open **MBKRU Voice chatbot** and get English help for report + diaspora + commitments questions
3. Explain chatbot is **not** a translator / lawyer / emergency service
4. Submit a Voice report and retrieve via tracking code
5. Create and sign a petition (incl. guest email confirm)
6. As admin, create DRAFT community, activate, join as member

7. Explain OPEN vs APPROVAL_REQUIRED
8. Describe Council MP Evaluation -> reports queue
9. Add/update a promise on the correct public tracker
10. Explain triple-index scorecard in plain English
11. Walk diaspora hub -> official signpost -> feedback
12. Name three things MBKRU is **not**
13. Find MBKRU Voice analytics in admin
14. Deliver the **one-minute security pitch** and name at least five concrete controls
15. On `/report-card`, filter **Verified only** and **Unverified only**, and explain staff tiers
16. As admin, change a report's experience verification tier and confirm the public filter updates

Appendix C - Connected services

Service	Used for	If missing
PostgreSQL	All data	Site cannot run
Email (Resend)	Alerts	Forms still save
SMS (Twilio)	Optional SMS	Skipped
Turnstile	Bot protection	Forms still work
OpenAI	Rich chatbot answers, optional speech	**FAQ fallback still works**
Tavily	Optional web context in chat	Chat works without it
Redis	Shared rate limits	In-memory fallback

Appendix D - Document control

Field	Value
Owner	MBKRU programme operations / training lead
Version	2.2.2 - July 2026
Chatbot language	**English-only training demos (no translation promise)**
Registration policy	**No Ghana Card at registration**
Report Card Voice	**Verified / Unverified public filter live**
Security module	**Section 16 - layered platform security for trainers**
Accuracy audit	**Section 20 - UI / backend / admin verification**
PDF companion	`docs/MBKRU_TRAINING_TEAM_HANDBOOK.pdf`

End of Training Team Handbook v2.2.2 - MBKRU Advocates. Prepared for professional staff training and full feature handover.
